march 19, 2016 // warsaw, poland

Meet.js Summit is a conference that gathers **350 front-end developers** each year, while the brand is known among **5000 enthusiasts of HTML5, CSS3, Angular.js, React.js, Redux, Flux, ES2015, node.js or Gulp**. Tickets for meet.js Summit usually **get sold in 5 minutes** and the waitlist is occupied by **hundreds** of developers who don't want to miss our event.

The next Summit will take place on **March 19, 2016** in **Luna Cinema, Warsaw**, which is comfortably located in the city centre (5 minutes from the train main station – Dworzec Centralny).

We strongly encourage you to take part in our event and support our community.

what is meet.js?

Meet.js is the name for JavaScript meetups in Poland, organized for programmers who are interested in JavaScript, HTML and CSS. Our events have been organized for 5 years now in 10 major business hubs in the country (Warsaw, Cracow, Poznan, Wroclaw, Gdansk, Lodz, Katowice, Szczecin, Lublin and Bialystok). They are free of charge. Average number of attendees fluctuates between 100 and 200 guests per meetup, which makes meet.js one of the largest technical community around the Europe. This is a perfect place for fostering your professional network as well as recruiting new candidates.

Once a year as meet.js community we organize a big conference called meet.js Summit. We meet in one city to discuss topics that have trended in the previous year. Meet.js Summit is attended by 350 people each subsequent year and tickets get sold in 5 minutes.

why is it worth to sponsor meet.js Summit?

Meet.js Summit 2016 is the fourth installment of the conference. At Summit you will meet experienced front-end developers and people fascinated by modern web technologies who constantly pursue to learn new things. They may turn into an ideal target of your recruitment process or a dream customer of your product. There are many case studies proving that attendees change their jobs after the conference and get motivated to take on new challenges in their careers.

what attendees say?

I'm not a JS programmer. I'm mainly a Java programmer, only sometimes have to do something in the front-end. This conference was very interesting to me, as a lot of stuff was new to me.

I bow down deeply before organizers. Great event, nice atmosphere, many friends.

I find meet.js Summit successful. Very good organization, great people, interesting topics. During a day people were approaching me to thank me for my blog, I have had many good discussions which was a very nice thing.

It's another good review of the conference that I've read. I'm glad that event quality is set at the world-class level.

Kudos for organizers. They did a good job! Well-located venue, Gdansk as a whole, which occurred to be a great city, good talks, brilliant parties - it's more than enough to make attendees happy.
